HEAD OF LOCAL FORD AGENCY VISITS PLANT

That the future of the automobile as a vehicle of commerce is assured and that men of the importance of Henry Ford are engineering high paid experts to build the best possible car, without in any way neglecting the manufacturing of pleasure cars, is the impression of Mr. Fred Charles, the head of the Dominion Motor, the local Ford distributor, who has just returned from a visit to the Ford plant in Dearborn, Michigan.

The enormous expansion and growth of the Ford plant in both the Canadian and American factories during the last year, was a matter of amazement to Mr. Charles, who declares that the development of both plants is spectacular and credits to the increasing demand for Ford cars and trucks.

Mr. Charles, who will be back in the city for the market shortly, has been in the Ford plant for several days, and has seen the public Mr. Charles believes it will not only fulfill the demand for Ford cars and trucks, but will also be a great success in the future. Mr. Ford has had the same idea in mind for many years, and has been working on it ever since. Mr. Charles is a great admirer of Mr. Ford, and has been in the Ford plant for many years.

A New Power in Motordom!

The smooth and mighty power of the steam engine - and obtained without the use of special fuels - - -

There is a new power in motordom—totally different in development and expression—totally new in range and efficiency—the smooth and mighty power of the steam engine delivered with the silky ease, dash and vivacity that stand out from all performance with brilliant luster.

The basis of this great Hudson capacity is a new companion invention—the steam engine principle which turns waste heat to power. Together they combine the highest efficiency in power generation and transmission ever achieved within our knowledge. It makes Hudson the most economical car per pound weight in the world.

In the new Hudson motor, spark knock heretofore characteristic of the high-compression motor is eliminated.

Exhausting gasoline gives the performance results sought through special high-compression fuels.

The New Hudson is receiving the greatest public recognition in Hudson history, because in all ways it is the greatest Hudson Super-Six ever built.
